Gilbertus Kristo Anugerah Adviandito

AI Engineer · Computer Vision & Automation

Informatics Engineering student at Universitas Negeri Semarang who trains computer vision models, wires LLMs into business workflows, and writes the APIs and automated tests that keep them running in daily use. Started on the backend with Laravel and Node.js, studied cloud computing at Bangkit Academy, and has two peer-reviewed papers on image classification.

EDUCATION

Universitas Negeri Semarang (UNNES), Informatics Engineering 2022 - present
Software engineering, databases, cloud computing, and machine learning.

Bangkit Academy (led by Google, GoTo, and Traveloka), Cloud Computing cohort Aug - Dec 2023
Backend development, Google Cloud deployment, and ML fundamentals.

SELECTED PROJECTS

Rep Counter · Computer vision 2026 · demo · source

- Recognizes 22 exercises, counts reps, and flags bad form from a webcam; 0.822 macro-F1 on held-out videos.
- MediaPipe landmarks feed a 1D-CNN exported to ONNX that runs in the browser, so no frames leave the device.

MediaPipe Pose, PyTorch, 1D-CNN, ONNX Runtime Web, Playwright

Pilah · Image classification 2026 · demo · source

- Waste classifier that tells users which bin an item belongs in; 0.939 macro-F1 on 1,836 test images.
- Fine-tuned MobileNetV3 quantized to a 4.2 MB int8 ONNX model that runs on the phone.

PyTorch, MobileNetV3, ONNX, pytest

LabelGuard AI · OCR automation for PT Berlian Artha Label 2026 · source

- Operators photograph a garment label; OCR reads it and every field is checked against the purchase order before shipment.

Tesseract.js, Sharp, Node.js, Prisma, PostgreSQL, Redis, Docker

Travel Booking Engine · Distributed systems (in progress) 2026 · source

- Hotel aggregator that merges inventory from several suppliers into one search and runs the booking saga through to an e-voucher.

Next.js, Express, PostgreSQL, Redis, RabbitMQ, Kafka, Jaeger, k6

PUBLICATIONS

Optimasi Kinerja Klasifikasi Motif Batik pada Arsitektur MobileNetV2 melalui Strategi Fine-Tuning 2026
G. K. A. Adviandito, M. I. Afif, A. L. Mahendra, M. A. Muslim. *Jurnal Ilmiah Wahana Pendidikan*, 12(6.D), 199-213. Fine-tuning raised accuracy from 94.00% to 99.85%. Link

Implementation of Xception method for Early Detection of Plant Diseases 2024
G. K. A. Adviandito, A. D. Widiantoro. *SISFORMA*, 11(2), 199-207. 97.63% validation accuracy on 54,305 images.
doi:10.24167/sisforma.v11i2.14741

SKILLS

AI & automation	PyTorch, TensorFlow, ONNX Runtime, MediaPipe, OpenCV, scikit-learn, Hugging Face, Tesseract OCR, n8n, Make, Zapier, Claude / Gemini / OpenAI APIs
Backend	Python, TypeScript, Node.js, Express, Flask, Laravel, Prisma, REST APIs
Data & infrastructure	PostgreSQL, MySQL, MongoDB, Redis, Supabase, RabbitMQ, Kafka, Docker, Google Cloud, Vercel, Prometheus, Grafana, Jaeger
Frontend & testing	React, Next.js, Tailwind CSS, Vitest, Jest, Playwright, pytest, GitHub Actions

ORGANIZATIONS

Chief Executive, Ilkom Social Journey Nov 2023
Led planning and coordination of the event in Magelang.

Expert Staff, Social Affairs, Hima Ilmu Komputer UNNES 2023
Designed community programs, including IT training for local residents.

CERTIFICATIONS

Applying Machine Learning with Google Cloud (Dicoding, 2024) · AI Fundamentals (Dicoding, 2024) · Becoming a Google Cloud Engineer (Dicoding, 2024) · Back-End Development with Google Cloud (Dicoding, 2024) · Python for Data Science (HiColleagues, 2024)
